

## Filtration and microfiltration products for applications in agricultural analysis

The following filter papers and microfiltration products are ideal for fertilizers analysis applications

PROCESS	TECHNIQUE	FILTER TYPE	REF. CHM
Solid-Liquid Separation	Filtration (Funnel/Buchner Funnel)	General Purpose Qualitative Filter Paper	F1093-
Gravimetric Analysis	Ashes Determination	General Purpose Qualitative Filter Paper	F2040- F2041- F2042- F2043- F2044- F2045-
Nitrogen Determination		Quantitative Filter Paper	F2040-
Determination of soluble Phosphorus in water and ammonium citrate	Filtration (Buchner Funnel)	Ashless Qualitative Filter Paper	F1005-090
Insoluble Nitrogen Determination in water		Ashless Qualitative Filter Paper	F1002-125
Free and total aminoacid		Quantitative Filter Paper	F2040- F2043-
Determination of solubles in suspension	Weight difference	Glass Microfiber	GF3-
Phosphates and Nitrates Determination	Liquid Chromatography HPLC	Regenerated Cellulose syringe filter 0,45um	SRC045025Q
