

### Filtration and microfiltration products for applications in agricultural analysis

The following filter papers and microfiltration products are ideal for fodders analysis applications

PROCESS	TECHNIQUE	FILTER TYPE	REF. CHM
Fat Determination	Soxhlet/Tecator Extraction	Cellulose Extraction Thimbles	F5800-
Liquid-Solid Separation	Filtration (Funnel/Buchner Funnel)	General Purpose Qualitative Filter Paper	F1019-
Gravimetric Analysis	Filtration (Buchner Funnel)	Quantitative Filter Paper	F2040- F2041- F2042- F2043- F2044- F2045-
Calcium Determination		Quantitative Filter Paper	F2043-
Organic Samples Clarification	Cromatografía líquida HPLC	Nylon / Regenerated Cellulose Membranes 0,45um	MNY045- MRC045-
Mobil Phase Filtration		Regenerated Cellulose Membranes 0,45um	MRC045-
Microorganism Retention	Microbiological Analysis	Cellulose Nitrate Membrane 0,45um white gridded, sterile	MNW045047H-SG
Microorganism Incubation		Petri Dishes+ Absorbent pads steriles and non-steriles	SSP050T-S SSP050T
Separation of Suspended Solids	Weight difference	Glass Microfiber	GF3-
Liquid-Solid Separation	Filtration (Buchner Funnel)	Ashless Filter Paper for Qualitative Analysis	F1001- F1002- F1003-
