

Filtration and microfiltration products for applications in milk elaboration and laboratories

The following filter papers and microfiltration products are ideal to elaborate, clarify and prepare milk before further analysis.

PROCESS	TECHNIQUE	TYPE OF FILTER	REF. CHM
Gravimetric Analysis	Filtration (Funnel/E. Buchner)	Quantitative Filter Paper	F2040- F2041- F2042- F2043- F2044- F2045-
Liquid- Solid Separation	Metal elimination in fats	Qualitative General Purpose Filter Paper	F1093-
Determination of suspended solids	Weight difference	Glass Microfiber Filter	GF3-
Clarification of organic samples	Liquid Chromatography HPLC	Cellulose Regenerated Syringe Filter, 0,45um	SRC045025Q
Micro organisms Retention	Microbiological Analysis	Cellulose Nitrate membrane. White with black grid. Sterile individually packed. 0,45um, 47mm.	MNW045047H-SG
Micro organisms Incubation		Petri dishes with absorbent Pad. (Sterile and non-sterile version)	SSP050T-S
